

PRESS RELEASE
May 2017

17 Technology companies selected to showcase at Venture 5i® Grenoble-Alpes – 1st June 2017

The **Venture 5i®** Selection Committee (financing forum organized within the Forum 5i®) has selected **17 innovative companies** to showcase during the **Venture 5i®** event on June 1st. 14 are originated from France (Alpine region, Bas-Rhin region and Alpes-Maritimes region), 1 is originated from Austria and 2 from Italy.

The prestigious selection committee composed of national and international investors, is chaired by **Diego Braguglia, VI Partners – CH**. In total, almost 150 evaluations of pre-qualified companies were performed.

The total cumulated fundraising of these 17 companies, in several fields as Bio & Medtech / Electronics / Industrial Manufacturing – Material and Transport Technologies / Informatic & Telecommunications / Measurement Tools / Protecting Man – Environment – Energy, represents nearly € 50 **million**, reflecting the dynamism of those projects.

❖ Bio & Medtech

Decro – France (38)

Smart instrumentation for rodents.

Dianax – Italie

The laboratory in the palm of your hand.

Sinnovial – France (38)

The right treatment to the right patient at the right time !

Sublimed – France (38)

SUBLIMED is developing actiTENS, an innovative and connected medical device for chronic pain management, based on a proven non-drug therapy.

❖ Electronic

Evaderis – France (38)

Data-efficient world

Insight Sip – France (06)

Experts in RF circuit miniaturization, system-in-package and antenna-in-package ! It's all in the package ! In shorter time !

❖ Industrial Manufacturinging – Material and Transport Technologies

Cooltech applications SAS – France (67)

Cooltech, World leader of magnetic refrigeration, First player worldwide to offer an industrialized magnetic heat pump solution with a world level patent portfolio.

Motorsat – France (38)

Design and commercialization of motor for satellites which work without propellant.

Rosi SAS – France (38)

Waste is displaced resource ! Rosi technology recycles PV Silicon from diamond wire wafer sawing kerf waste, leading to significant cost reduction in PV energy production.

❖ IT & Telecommunications

Apitrak – France (38)

Save time and money by locating your medical devices.

Argosim – France (38)

System requirements validation.

Bluemint Labs – France (38)

Bluemint Labs is a French startup specialized in Ultra-low-power-human-machine-interfaces.

Pulse Origin – France (38)

Seamless technology, better experience.

Voome Networks S.R.L – Italie

Voome Networks provides software tools for managing and distributing multimedia content across digital screens. « Your message, Our mission. »

❖ Measurement Tools

Bright Red Systems GMBH – Autriche

Development of Inline Wafer Edge Inspection Metrology to be integrated into production equipment saving inspection time, optimising processes and increasing yield.

Hprobe – France (38)

Speed up wafer-level magnetic test.

❖ Protecting Man – Environment – Energy

Hydrao – France (38)

Smart solutions for water conservation and management.
